## Summary

---

As a final-year Computer Science student with experience in software development, I possess a strong foundation in software development, data structures, and algorithms. My analytical and debugging skills, coupled with my passion for building efficient programs and applications, make me a valuable asset to a team. Proficient in C#, JavaScript, Flutter, and ReactJS and familiar with technologies such as Bash, NodeJS, and ASP.NET framework. I am set to graduate in December 2023 and I am eager for opportunities to apply my skills, contribute to a team and continue to learn and grow as a developer.

## EDUCATION\*

---

### Trent University

Bachelors in Computer Science, 78.5 GPA

Peterborough, Ontario/Canada

December 2023

---

## Experience

---

### Overscore Media, Contract Web-developer

June 2022 - Current

Skills: HTML, CSS, Javascript, ReactJS, Node, MongoDB, MySQL

### Unknown At the moment, Flutter developer Intern

May 2023 - current

Skills: ASP.NET, C#, Flutter

### Mcdonald's, Crew Member

JULY 2022 – NOVEMBER 2022

### Richbon Nigeria Limited, Sales Associate

JULY 2018 - NOVEMBER 2018

---

## Projects

---

### WhatsApp Clone (2023 - current)

- In an effort to familiarize myself with the Flutter framework for my most recent internship. I decided to pick up a personal project where I aim to replicate WhatsApp IOS design. The goal of this project is to help me grasp state management and responsive Mobile designs.

### Drum Rock Jerk Restaurant (2022 - 2023)

- Drum Rock Jerk Restaurant is an online restaurant my fellow peers and I are working on for our final year software engineering project. The best part about this project is that we are implementing our own ASP.NET CORE API and we are building it for our barber because he wants to venture into the food business.

### ISHCUTS Booking System (2022)

- A personal project and a solution to my friend's barbing business, built with MERN stack.

## Airport Network using Graph (2022)

- A simulation of Airport networks using a graph data structure and written in C#.

## Cryptocurrency Tracker (2022)

- A website that allows users to create a portfolio to track their favourite cryptocurrencies and provide them with news updates.

## Our Solar System Model (using ThreeJS) (2022)

- A coursework project and simulation of our solar system, created using WebGL and ThreeJS library.

## Client-Server Project (2022)

- A coursework project that implements the client-server architecture.

## Peer-2-Peer Project (2022)

- Another coursework project just like the client-server project but implements the Peer-2-Peer architecture instead.

## **ADDITIONAL**

---

**PROGRAMMING LANGUAGES:** C#, JavaScript, HTML/CSS, SQL, Java, C/C++, Python, PHP.

**TECHNICAL SKILLS:** Web development, SQL relational database, MongoDB, Analytical mindset and debugging skills, Project management and collaboration, Restful APIs, communication, teamwork, problem-solving.

**LIBRARIES & FRAMEWORKS:** Bootstrap, jQuery, ReactJS, NodeJS, WEBGL, ThreeJS, ASP.NET Core

**INTERESTS:** Gym, basketball, coding, gaming, learning and experiencing new things

## **Relevant Coursework**

---

- Data Structures and Algorithms
- Software Engineering Project
- Systems Programming
- Fundamentals Of Operating Systems
- Database Management Systems
